GOVT. ENTRY NO. 5848

Memo

Letter No. 148 dated the 17 instant, from the President, City Municipality, Mysore Submitting for sanction an estimate for Rs 285/- being the Cost of repairing 40 sheds at Chetnahally Camp, Mysore.

---

1. In this office No. 1658 / L.B. p389 dated 29th July 1901, the President was asked to report what arrangements have been made for putting up sheds in order and for supply of materials to such of the residents of the city as may wish to Camp out in accordance with para I of Govt. Pro. No. 1122-4 / L.B. p178-80 dated 22nd July 1901.

2. In reply the President

With his letter No. 148 dated 17th V
instant, submits an estimate
for Rs 285/- for repairing 40
sheds in the Chetnahally Camp
and states that there are sheds
in three other places, which will
be repaired by the palace
department as they are under
their charge and also that he
has arranged with the District
Forest officer to have 4,000
big bamboos and 10,000 small
bamboos in stock in the wood-
-yard for supplying to the people
who may wish to Camp out.

Letter No 3366 & 10/11/04 from the President, Dmpore City Municipality, submitting for sanction an Estimate for Rs 425/- for Constructing Sheds

— " —

As per para 1. of the Govt. Progs. No $\frac{1122-4}{2.B(P).178-80}$ & 23/4/04, the President, Dmpore City Municipality with his No 148 & 14/8/04 submitted an Estimate for Rs 284/- for repairing & putting in orders 40 Sheds in Chatnahally Camp, Dmpore. This was sanctioned in G.P. No $\frac{3328-29}{683-4}$ & 28/8/04

With reference to the said G.P. No $\frac{1122-4}{2.B(P)178-80}$ & 23/4/04, the Presidt now submits

submits
I've the above Rs 336 of
10/11/01 an Estimate
amounting to Rs 425/-
for the Construction of 16
more sheds (4 small, 12 big)
with 3 temporary latrines
for
and also improving 2 zinc-
sheet sheds in Chatnahally
Health Camps; and request
Sanction for the same as

Why should this be
sanctioned from Plague
funds? Was that the in-
tention of the order that
sheds should be provided for
every one at Govt Cost? Refer about
payment from
Palace funds

11/12/1901

Put up 5/12/01

Submitted

A sum of Rs 7996-13-0 being the expenditure incurred by the palace authorities at Jaypore, in Connection with plague preventive measures from October 1898 to September 1899 was debited to plague funds as per Govt. phs. No 526-7 dated 15th November 1899.

The above sum includes an expenditure of Rs 715 5-11-4 incurred for the Construction of sheds for the use of the palace servants at Jaypore.

17.12.1901 17/12/01.

Subd to Secty.

The above remarks shew that the cost of Constructing Sheds for Palace Servants is debitable to Plaguefunds. The order is general that Sheds should be provided for those that are likely to use them.

18/12/1901

The order is quite clear about the repair of huts or new sheds of huts that are unoccupied & those who go to Camp for occupation. I do not however find it by any means clear that we should provide huts for all who may wish to go into them whether rich or poor. That kind of obligation does not seem to have been assumed anywhere and to assume it without qualification may be embarrassing. Submitted for orders to the Vice Councellor.

What is asked for is Rs 425 for constructing 6 sheds more.

From

The Officiating Senior Surgeon and Sanitary Commissioner with the Government of Mysore, Bangalore.

To

The Secretary to Government

General and Revenue Departments, Bangalore.

No. 21/P.

Dated 16/4 July 1901.

Sir,

I have the honor to state that on Thursday morning 11th instant I arrived in Mysore, and with Mr.V.P.Madhava Rao Senior Councillor, the Civil Surgeon and President of the Municipality saw a good deal of the city. On Friday morning I made a further short inspection with the Civil Surgeon only, and on Friday evening I made my inspection alone.

2. There were two matters which specially claimed my attention viz. plague preventive measures and the question of how the Dodkere tank might be best dealt with.

3. In regard to plague preventive measures, I see no reason to alter the recommendation I made on 22nd May- viz. that the infected circles should be forthwith cleaned up so as to prevent plague and not wait till the plague actually attacked houses before disinfecting them. (1) There is a very large number of good huts standing idle at the various camps and these could be utilized to accommodate the inhabitants of houses which cannot be cleaned up so long as the people remain in them. I suppose 100 families at a time could be moved out. What I mean by cleaning up is that the (a) interior should be white washed and (b) the cow dung floors removed, while airing should be carried out as completely as possible either by opening (c) the roofs or walls of all rooms whose doors do not communicate with the open air direct. My idea is that the worst houses, and their name is legion (d) should be done at once- good houses, shops freely open to the air should not be interfered with- it is quite sufficient and indeed it will be no small task to get the hut type of house alone done up in

the

Please give orders to D. Commissioner rather President City Mr. & there these huts to put in order & fit for occupation A rough estimate to be made & sent up within a week

the way I have described. As soon as the huts are well cleaned, provided plague has not actually occured in them this year, the inhabitants should be allowed to return Carts and other facilities should be provided for the transport of goods to and from the camps- a bazaar in each camp might prove a convenience. Camp huts will be fit for occupation by a fresh batch of families after 24 hours though airing and sweeping- If plague occured in any hut then that hut would have to be thoroughly disinfected before occupation by a fresh family.

Scavenging is possibly better looked after than it was last year but much remains to be done in that direction. Numberless remains of old huts in the shape of ruined walls yet exist, to be used in many cases as latrines. This should not be allowed to continue. When houses are dismantled they should be razed to the ground.

5. The habit of allowing pools to form near stand-pipes is very reprehensible. If water is required for cattle, proper drinking troughs should be provided either in wood or stone

6. As to Dbdkere tank I think it can very well be preserved if not over its whole original extent, at any rate for about 2/3ds of that extent. But it is absolutely necessary to deepen the part kept as a tank. Iwould recommend that that portion of it between Ittygagude road and the row of willows running across it at the further end of Ittygagude be closed by raising the ground there sufficiently to prevent its being flooded. The material for this purpose can be got from the rest of the tank which will thereby be considerably deepened. As the upper layers of the bed of the tank are possibly rich in manurial properties, the ryots might be induced to cart them away for use on their farms; the further deepening, say for ten feet would have to be done by paid labour, and would cost a good round sum but would be well worth the expenditure considering both the importance of the tank to the city of Mysore and its use as an irrigating tank to the gardens' existing below its level.

I may say that if the tank is refilled by the new feeder without being deepened it will be certain to spoil the health of the inhabitants not only of the fort but especially of the houses lying below the feeder, for it will be impossible to keep up a current in the feeder, and it will consequently be kept full of dead water which will soak away amongst the low lying buildings on its right bank. The construction of this feeder is a very grave Step from a sanitary point of view and I trust it is in proper hand. It is not a project to be played with by amateurs. I find no provision for diverting surface sewage from it- and if this is not done the Dodkere will simply become a receptacle for sewage- not a drop of town surface drainage should be permitted to enter it. It should in no case be put in use till Dodkere is deepened.

This may be referred to the P.W.D

7. The reservoirs on the hill which receive the water from the Cauvery are being polluted. I was just a few minutes late to catch a human being washing himself or his clothes in the open feeder where it passes under the road- but when I got them the cement border was still wet, there was a piece of dirty blue cloth and a small handful of country tobacco left there in the hurry of its owner to get away. I gave some of the tobacco to the watchman- I have kept some of it lest any one may wish to see it. No more completeevidence of human defilement of the water could we have unless we actually saw the human being who left his cloth and tobacco behind, actually " at work". It seems a great pity to bring in water all that way and leave it open to may even invite the way farer to defile it. I cannot see what objection there can be to covering in the feeder and to surrounding the reservoir with a proper fence. The question of cost is not worth considering, when the great outlay already made in bringing the water all the way from the Cauvery is borne in m

Colonel has drawn the fencing of the feeder Channel as also of the reservoir & the Govt might invite their attention to it.

8. On the whole the sanitary condition of Mysore leaves much to be desired and it is vain to expect the busy Civil Surgeon of the District to look after it as it deserves

deserves even in non-epidemic times. It is equally vain to expect an unskilled Vice President to do this work- it is a Specialist's work-and I cannot recommend too strongly that a whole time health officer be posted to Mysore with as little delay as possible. How he should act and the powers he should have I pointed out last year and I have nothing new to add now.

This has been done
9.3.

SECTION— P.G.

GOVERNMENT OF MYSORE

FILE No. 2 of 1901-2

SER. No. 2

Proceedings of the Government of Mysore.

Read :—

Letter no 21 P dated the 16th July 1901 from the Senior Surgeon and Sanitary Commissioner with the Govt of Mysore, embodying his views on the inspection of the Mysore city dated 11th and 12th July 1901.

Order thereon :-

No. 1122-4 / 78-180 dated, Bangalore 22nd/23 July 1901

In regard to Plague preventive measures; the Senior Surgeon recommends in the above letter that the infected circles should be forthwith cleaned up so as to prevent plague and that ~~the~~ should not wait till the plague actually attacks houses for

disinfecting them. For this purpose, he proposes that people living in such of the houses as cannot be cleaned up so long as they remain in them, should be provided with huts standing unused at the various Camps. The President Mysore City Municipality, is therefore requested to see that these huts are put in order and made fit for occupation at once, a rough estimate of the cost therefor being sent up to Government for sanction within a week.

.2 The process suggested by the Senior surgeon of cleaning houses is:—

(a) that the interior of huts should be white-washed,

(b) That cow-dung floor should be removed, and

(c) ... that airing should

be carried out as Completely as possible by opening either the roofs or walls of all rooms whose doors do not communicate with the open air direct.

3 The Senior Surgeon says that it is quite sufficient if the hut type of house alone is dealt with in the way described above, good houses and shops freely opened to the air not being interfered with.

4 The Senor Surgeon also suggests that carts and other facilities should be provided for the transport of goods to and from the camps, that a bazar in each camp might prove a convenience and that camp huts should be made fit for occupation by a fresh batch of families after 24 hours thorough airing and

Sweeping

sweeping; any huts in which plague cases may occur being thoroughly disinfected before occupation by a fresh family.

5. Government, however, consider that it would be safer to burn the temporary huts in which plague cases may occur instead of disinfecting them and allowing ~~others~~ to occupy them

6. Major Smyth observes that though scavenging is better looked after than it was last year, yet, much remains to be done in that direction and that the ruined walls of numberless old huts which have been dismantled stand as a cover for the commission of nuisances, and advises that they should all be razed to the ground. The Presedents' attention is drawn to this point as also

to the practice of allowing pools to form near stand pipes. If water is required for cattle, proper drinking troughs should be provided

7 The President is requested to give immediate effect to the above instructions

Letter No 21 P. dated the 16th July 1901 from the Senior Surgeon and Sanitary Comr with the Govt of elysone, embodying his views on the Inspection of the Myson City dated the 11th and 12th July 1901.

No 1122-4 8/25/1901
2 B(P) 178-180

Order thereon

In regard to plague preventive measures, the Senior Surgeon recommends in the above letter that the infected circles should be forthwith cleaned up so as to prevent plague, and that we should not wait till the plague actually attacks houses for

before

before disinfecting them and for this purpose, he proposes that people living in such of the houses as cannot be cleaned up so long as they remain in them, should be provided with huts standing unused at the various Camps The President, Clyde Port City Municipality, is therefore requested to see that these huts are put in order and made fit for occupation at once, a rough estimate

of

of the cost therefor being
levied up to Govt. for
sanction within a
week.

2. The process sug-
gested by the Senior
Surgeon of cleaning
houses is ~~as follows:~~—

(a) That the interior
of huts should
be white-washed;

(b) that ~~the~~ cow dung
floor should be
removed,

(c) and that airing
should be carried
out as completely
as possible by
opening either the
roofs or walls of
all rooms whose
doors do not com-
-municate with
the open air direct.

~~(3)~~ The Senior Surgeon says that it is quite sufficient if the new type of house alone is done up in the way described as above

~~(3) and~~ good houses and shops freely open to the new not being interfered with. /4/ The Senior Surgeon also suggests that carts and other facilities should be provided for the transport of food to & from the Camps,

(4) that a bazaar in each camp might prove a convenience.

(5) and that camp huts should be made fit for occupation by a fresh batch of families after 24 hours ~~thoroughly~~ thorough airing & sweeping; any huts in which plague cases may occur being thoroughly disinfected before occupation by a fresh family.

The Govt. however considered that it would be safer to burn the temporary huts in which plague cases may occur instead of disinfecting them and allowing others to occupy them.

6. General and Revenue depts

Sir

With reference to Government Proceedings no 1122-4/L.S.D(P) 178-80 dated 22nd July 1901 regarding Construction of sheds in the City of Mysore, I have the honor to submit herewith an estimate amounting to Rs 425/- for the Construction of 16 more sheds (4 small, 12 big) with 3 temporary latrines and also for improving 2 zinc sheet sheds in Chetnahully Health Camp

These sheds were undertaken as the Palace Controller wanted some more families of the Palace Servants to Camp out. I request that you will be good enough to obtain the sanction of Government for the same from Plague Funds

I have the honor to be,
&c.,
Your most obedient Servant
